SERVICE & SUPPORT

Combilift's after sales team is committed to providing excellent support and customer service.

We provide the highest standards of training to our service personnel and have a wide network of factory trained response technicians.

We have dedicated spare parts consultants and many dealers located around the world.

Through our dealer network and worldwide Combilift offices we can provide:

- Technical support (via telephone or at your location)
- Fully stocked spare parts facilities
- Full maintenance contracts
- Service training

Die cast models available

Combilift will provide you with a **free warehouse design/evaluation** with **no obligation**.

A specialised Combilift warehouse consultant can complete a **free onsite survey** to ensure you get the best solution for your materials handling requirements.

Combilift's team of design engineers will analyse your requirements and supply you with free plans, enabling you to make the most of your available space.

Customised Raised Cabin Solution

THE COMBILIFT ADVANTAGES:

- SAFER Product Handling
- SPACE Savings
- RELIABLE Robust Simple Design
- INDOOR and OUTDOOR Use
- INCREASED Productivity
- LESS Product DAMAGE
- Operator and Maintenance FRIENDLY

- 35,000kg / 77,000lbs Capacity
- Handles container sizes of 20', 30', 40', 45'
- Low ground pressure when fully loaded
- Narrow Aisles for Maximum Storage
- Offers excellent 360° visibility from driver position
- Can travel in / out of warehouses
- Eliminates waiting trailers
- Safer stuffing/destuffing at ground level
- 2-Wheel hydrostatic drive with 2-wheel steer
- Front and rear independent sideshift
- Overall Dimensions Can Be Customised To Handle Non-ISO Containers
- Stack 2 High / 3 High

The Cost Effective Solution for Handling Containers and Oversized Loads.

Patents Pending- International Application No. PCT/EP2010/051971

CUSTOMISED HANDLING SOLUTIONS

Customised Handling Solutions is not just Combilift's slogan, it's our ethos. Combilift have become known as the **go-to company for material handling solutions.**

At Combilift we believe in providing the customer with the best handling solution available to them. Combilift's passionate and innovative staff **work closely with the customer** to solve their handling needs.

Combilift's goal is for every customer to be a referral.

Combilift products are in operation in various applications around the world. With their unique manoeuvring capabilities they enable the safe and efficient handling of bulky and awkward loads. The above are just some examples.

- THE COMBI-RT:**
- Small turning radius
 - Operates indoor and outdoor
 - Reduced maintenance costs
 - No mechanical brakes to adjust or replace
 - Minimised tyre spin
 - Offset driving position gives excellent visibility
 - 3 Wheel manoeuvrability
 - Fully hydrostatic drive
 - All wheel traction
 - Large tractor grip tyres
 - Deep suspension seat
 - Integrated side shift
 - Pivot forks

Designed For The Needs Of The Poultry Sector

Combilift is the world's first IC engine-powered all-wheel-drive multidirectional forklift. A combination of a forklift and sideloader it is highly manoeuvrable, very safe, highly cost effective and supremely efficient.

SAFER PRODUCT HANDLING

The Combilift is designed to handle long-loads safely. By eliminating the need to travel with long loads lifted high, the units provide greater stability. The integrated platform with low center of gravity also provides a more stable base. It is tested to CE machinery directive and complies with ANSI/AMSE B56.1 requirements.

SPACE SAVINGS

Using patented, leading edge technology, Combilift forklifts are equipped with a unique 4-way steering system that allows the units to travel sideways with long loads. This system gives the user multi-directional capability.

LONG LOAD HANDLING

The Combilift eliminates the unnecessary multiple handling of goods by being able to manoeuvre easily through doorways that are narrower than the load it carries. This results in **LESS PRODUCT DAMAGE** and safer handling as well as eliminating the need for oversized doorways or conveyors.

INDOOR AND OUTDOOR USE

Combilift operates equally efficiently both indoors and out including on semi-rough terrain. It is available with a fuel-efficient LP Gas / diesel engine, eliminating the need for an indoor forklift and an outdoor forklift.

MAINTENANCE FRIENDLY

The combilift is designed and built using well known components for ease of service anywhere in the world.

GREEN

Gaining up to 100 % more storage space leads to a reduction of fleet sizes, emissions, operation cycle times, handling and storage costs.

THE AISLE-MASTER VNA:

- Enables a dramatic reduction of working aisle widths
- Increases storage space by up to 50%
- Works both inside and out
- Can operate on any floor surface
- Does the work of both reach and counterbalance forklifts reducing trucks needed and cutting costs
- Electric and LPG powered models
- Lift capacities of up to 2.5 t

Reduce Aisle Widths | Increase Storage Space | Cut Warehousing Costs | Improve Productivity

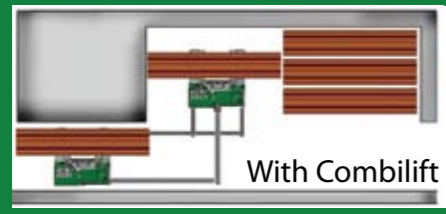

Front Door Option

Low Profile

COMBi-SR:
Rear Cabin

This hydrostatic all-wheel drive truck differentiates itself from traditional sit-down sideloaders by offering operators the opportunity to drive in four directions.

The Comblift SL range allows companies to have the benefits of a narrow aisle sideloader with superior manoeuvrability and the ability to block or bulk stack by driving forwards.

COMBi-GT

COMBi-ST

COMBi-GT

- Robust and reliable stand-up 2 way side-loader.
- LP Gas / diesel / electric
- Hydrostatic drive
- Works indoors and outdoors.
- Customised platform length

COMBi-ST

- 2.5t/3t Capacities available
- LP Gas / diesel/ electric
- Multi-directional

COMBi-ESL

- Stand- up operator
- Option sit down operator
- Suited for indoor and outdoor use

COMBi-ESL

- Multi-directional electric forklift
- Sit down operator cabin

FUEL TYPES

Combilift models are available in LPG, Diesel, Electric

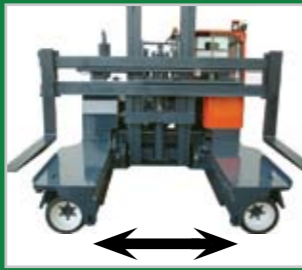

Sliding LP Gas Tank

AC Electric

ATTACHMENTS

There are a wide variety of attachments available for the combilifts. These include:

Wide Hydraulic Fork Positioner

Integrated Hydraulic Fork Positioner

Hook on 4 Fork Attachment

Telescopic Forks (IN)

Telescopic Forks (OUT)

Hydraulic Pipe Clamp

OPERATOR COMFORT

Central to all our designs is the focus on operator comfort and safety.

Spacious cabin with deep suspension seat

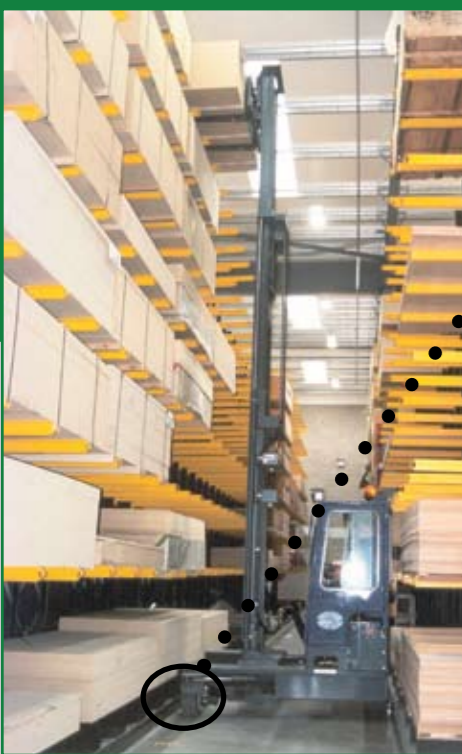

Air conditioning option

Ergonomic Controls

Optional joy stick control

GUIDED AISLE

Combilift's guided aisle solution is the ideal way to achieve maximum storage capacity in the available space.

It also reduces costs by eliminating possible damage to the racking, product or Combilift.

The guided aisles are designed by the warehouse design team to meet your specifications and a variety of racking can be incorporated to suit your needs.

THE COMBI-CB:

- More compact than a traditional counterbalance forklift
- Multi-directional operation,
- Handles palletised goods and long length products
- Available in LP Gas, diesel and electric
- Side shift as standard
- Integrated hydraulic fork positioner as option

FROM THE WORLD'S WIDEST RANGE OF 4-WAY HANDLING SOLUTIONS

The C-Series Combilift product range is available in LP Gas, Diesel with many electric models.

The models have a range of mast options with lift heights of up to 11m/36 ft and lift capacities up to 25,000kgs/50,000lbs.
