

# MultiBox

 **WashTec**

*3 functions combined in a single terminal –  
a convenient way to run your car  
wash business from the cash desk.*

## ***MultiBox***

The MultiBox has been developed to make your car wash business easier:

**Three functions in a single module:**

- Issuing of wash tickets
- Creation and checking of transponder cards
- Remote operation of the car wash system

## Ticket functions

The MultiBox is a **convenient tool for issuing wash tickets**.

The clearly visible numeric code on the ticket can be used to call up the ticket's history on the terminal. The programme, the creation date, the period of validity and the type of ticket, such as "free wash", "campaign wash" or "multiple washes" can be determined from the code.

## Transponder card functions

The MultiBox can be used to **create new transponder cards** and **easily check** existing ones. The cards can be programmed with various types of wash cycle. Data such as the type of programme, the creation date, the validity of the card or campaigns are programmed into the card. The transponder card is an **excellent tool for promoting customer loyalty** through the issuing of credits and multiple washes.

## Remote operation

From the cash desk in the shop or office, you can **conveniently supervise the car wash** and **carry out any changes to the programming**.

Changing the types of gantry operation, opening times and campaign periods are therefore much easier. The reading-off of wash figures and queries of error codes is also simplicity itself.

# The "World of WashTec" has everything for your success.

- **Comprehensive range:** The right solution for your washing business can always be found.
  - **Roll-over car washes** for low, medium and high washing volumes
  - **Conveyor tunnel systems** with modular design for all sizes and all requirements
