

Profile Wrapping Application Systems

Rugged, precise, reliable.

MELTON hot melt coating systems for **profile wrapping** are engineered to meet the demanding woodworking environment. Systems provide the customer with a superior quality product with considerable adhesive savings and minimal waste for less downtime and overall better production.

MELTON Profile Wrapping Applications offer:

- Consistent, even adhesive coating at all machine speeds
- Reduced adhesive usage
- Eliminated unnecessary waste and cleanup associated with glue roller
- Reduced maintenance costs and downtime
- Application of EVA or PUR hot-melts
- Side-to-side adjustment precisely lines up wrap
- Unique grid melting systems that reduce heat-up time
- Automatic line speed-tracking to ensure consistent glue volume at all speeds
- Telescoping adjustment screws to provide minimal overall head width

Back-up guide ensures uniform contact of wrap against head and kicks-out when machine stops.

Hot-melt units are available for any adhesive volume requirement.

Coating width and head position can be easily changed, even during production.

A compact design allows for quick installation without product guide modifications.

Profile Wrapping

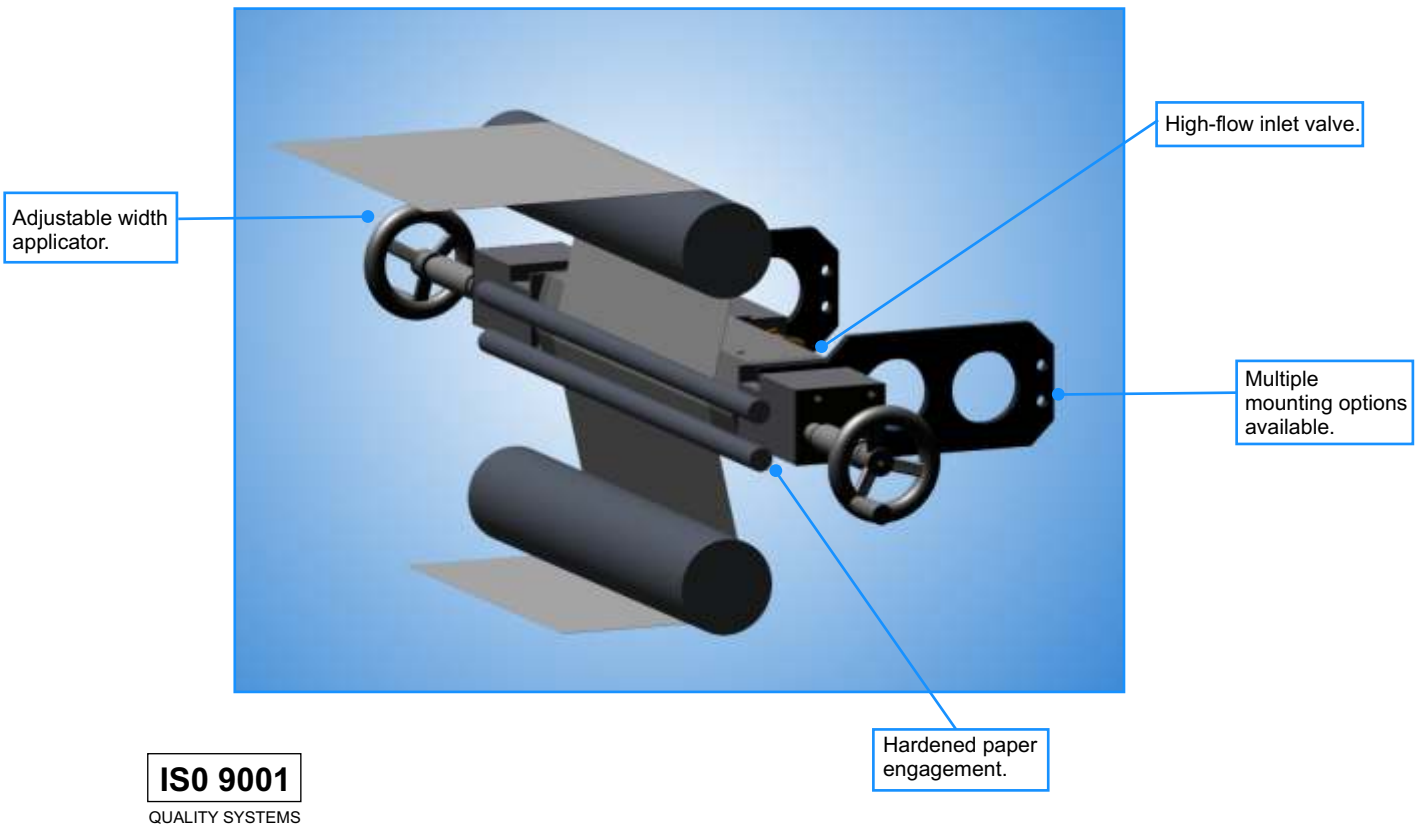

Units feature an easy-to-use touch pad with a bright vacuum-flourescent screen which allows operators to quickly setup system parameters and monitor system operation.

A TOTAL PACKAGE

MELTON offers a complete selection of hot-melt components and support equipment:

- RTD hot-melt hoses
- Manual and automatic dispensing valves
- Nozzle and applicator styles
- Mounting bracket packages
- Solid-state pattern control systems
- In-line filters
- Replacement parts for competitive systems
- High-performance hot-melt adhesives
- Cost-effective rebuild/exchange programs
