**Rioned**  
Setting the standard

***Flue gas device for faultlessly finding leaks***

- Portable flue gas device
- For every type of drain or sewer
- Harmless to humans and the environment
- Ease of operation
- Reliable and service friendly

# R i o S t e a m

**The RioSteam is a portable flue gas device that faultlessly finds leaks. It can be used for all drains and sewers of whatever diameter.**

**Furthermore the RioSteam is also used for controlling air streams in ventilating flues and vent lines and to control the density of chimneys.**

## Harmless

Mist is produced by means of warming up a special liquid. It is absolutely harmless to human or the environment.

## Supplied with the following features

The RioSteam has all functions a flue gas device needs to have:

- An electrical ventilator step less adjustable,
- A pulsator system giving a good and economic supply of the mist liquid,
- The possibility to adjust the quantity of mist,
- A temperature limitation.

Good access to operation buttons

## Reliable and operator/service friendly

The RioSteam is very reliable, solidly built and also operator/service friendly. The tank for the liquid, which can often be a vulnerable part of this type of machine, has been designed to reduce the risk of damage.
